Welcome to Five Points Eye Care Center!

We are honored that you have chosen our office for your child's vision and eye health needs. Your child has been scheduled for a Vision Therapy Evaluation on _____.

***The appointment will last approximately three hours,
be sure your child is well-rested and has eaten a good meal.***

Please visit our website at www.fivepointseyecare.com prior to your visit.

Dr. Meg Brya, O.D., completed her Bachelor of Science in Education from the University of Georgia. As a teacher, Dr. Brya worked with elementary school children for seven years. She then returned to UGA to pursue pre-medical studies in preparation for optometry school while working as a vision therapist at Five Points Eye Care Center. Graduating with honors from The Southern College of Optometry in Memphis, Tennessee, Dr. Brya has continued her interest in children and their visual development needs and is the Director of the Vision Therapy Clinic at Five Points Eye Care Center. She has been a member of the College of Vision Development since 1999 and is currently pursuing her fellowship in Developmental Vision. She is also a member of the American Optometric Association and the Georgia Optometric Association where she is President of the 10th District. Dr. Brya was awarded the 2009 Georgia Optometric Association's Young Optometrist of the Year.

As a part of the vision therapy evaluation, a comprehensive eye exam is also necessary to rule out disease and to correct any vision problem with glasses or contact lenses if necessary. The vision therapy evaluation consists of more specialized testing of the focusing, binocular, oculomotor and visual processing systems. The vision therapy evaluation consists of an in-depth sensorimotor evaluation performed by our Vision Therapist. After the sensorimotor evaluation is complete, your child will have an exam with Dr. Brya to complete the vision therapy evaluation. Based on the results of the sensorimotor evaluation and exam, Dr. Brya will develop your child's treatment plan.

Before your appointment:

- 1. Complete the enclosed patient registration form, including all medical insurance information and vision benefits. Please sign and date it.** Proof of insurance and identity must be provided before the date of service, otherwise the patient will be expected to pay in full for all services when services are rendered. If we are unable to verify benefits, the patient will be expected to pay at the time services are rendered.
- 2. Please read, sign and date the financial policy (green copy) enclosed.**
- 3. Please return both documents to us BEFORE your appointment:**
 - a. By fax at 706-549-6618, or
 - b. By mail. Please allow 5 business days for delivery.
- 4. Please notify our office 24 hours in advance if you need to change your appointment.**

The day of your appointment:

1. Bring snacks for your child.
2. Please arrive 10 minutes early to complete your paperwork if you were unable to do so prior to your appointment.
3. Bring your insurance cards with you so we can make copies.
4. If your child wears contact lenses, bring the boxes they came in (if you have them). All patients should bring all glasses and sunglasses that are currently worn.

Thank you again for choosing **Five Points Eye Care Center**. Please call us at 706-543-2020 if you have any questions. We look forward to meeting you!

Sincerely,
The doctors and staff at **Five Points Eye Care Center**

Five Points Eye Care Center's Specialties

Contact Lenses

Five Points Eye Care takes pride in offering the most advanced contact lenses for their patients. We have over a thousand diagnostic lenses available in our office for all types vision correction, including toric lenses for astigmatism, bifocal contact lenses for patients over 40 years old and many others. We fit specialty contact lenses including keratoconic contact lenses, continuous wear contact lenses and contact lenses for children. We have invested in a corneal topographer, an advanced computer that can help the doctors fit difficult contact lenses and monitor corneal diseases.

Eye Disease

Drs. Jon and Nadine Forché are residency-trained at Veteran Affairs Hospitals in ocular disease. We fit emergencies and urgencies like red eyes, sudden vision loss, and eye trauma into our schedule to ensure that our patients get prompt care for their problems. Our clinic offers the most technologically advanced computers and machines to diagnose eye diseases including diabetic eye problems, cataracts, corneal diseases, glaucoma and retinal diseases. We coordinate your care with highly trained specialists if surgery is needed.

Low Vision Rehabilitation

Dr. Jon Forché manages our low vision rehabilitation clinic for people with vision impairment from glaucoma, diabetes, optic nerve disease and macular degeneration. He prescribes individually selected specialized magnification devices and coordinates care with occupational therapists from Athens Regional Medical Center and rehabilitation teachers from VISTAS to help with daily living skills.

Orthokeratology or Overnight Vision Correcting Contact Lenses

Dr. Meg Brya is certified in Paragon Corneal Refractive Therapy, a specialized contact lens for nearsightedness. These contact lenses are worn at night and gently reshape the cornea to enable most patients to see without contact lenses or glasses during the day.

Vision Therapy

Dr. Meg Brya supervises our vision therapy clinic. This clinic provides individual sessions with a trained therapist for children suffering from visual problems that can affect learning, including amblyopia ("lazy eye") and focusing problems.
